

Oct 22, 2004

Please see that the following message gets to the appropriate people. As an avid radio listener and parent, it is very important that the opinions of the public matter. It would be sad to have to listen strictly to cd's, etc. if the choices on our radios go away.

Air1 radio station is a very vital part of our household and community. It offers an alternative to the negative, unethical, suggestive and destructive music and advertising offered on most common stations. It offers positive messages and hope to our young people. Replacing Air 1 would be a terrible mistake, giving us little to no options for radio listening. Please do not replace this valuable asset to our home and our community

Thank you.
